For the many modes of learning.

Endlessly versatile, the Node chair is unlike traditional school desks and chairs. Node is a natural fit across campus—from the classroom to the library, conference rooms to faculty offices and the many areas in-between—everywhere learning happens.

Node chairs are highly mobile and support collaboration, transition and movement for all the ways students learn. And with a wide range of base, seat, color and finish options, there's a Node for every body and every space.

A smart solution.

The Node chair is mobile and flexible and empowers seamless classroom reconfiguration. With Node, a classroom can move from a lecture-based mode to a team-based mode and back again without interruption. Node takes passive space and makes it active, supporting individual and team-based learning.

For every campus seating need.

With a range of choices, there is a Node for nearly every design concept and seating need. The steel X-base and four-leg wood base options offer a sophisticated, practical choice for a variety of campus applications, including libraries, cafés, seminar and training rooms. The optional seat cushion extends user comfort for long periods of study and work.

More styles for more settings.

ELEVATING FACULTY SPACES

The faculty role can be a demanding one. On top of the core teaching role, there are administrative and advising responsibilities. As guest seating for faculty spaces, Node supports multiple modes of interaction between teacher and student. And that's important—because when both sides are supported, the whole institution succeeds.

STUDENT LIVING AND LEARNING

In living areas, students do more than socialize and sleep—it's where they do a large amount of learning and studying. With a variety of bases, seats and worksurfaces to choose from, Node brings student living areas alive and gives them the same energy and functionality as a high-performing classroom.
